Dear Ms. Henney:

We urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. That can leave physicians with no way to treat life-threatening bacterial infections in humans.

The adverse effects of medically useful antibiotics in animal feed stretch well beyond meat products damaging our local and global communities.

As members of the Center for Science in the Public Interest (CSPI), we support the petition filed against irradiation.

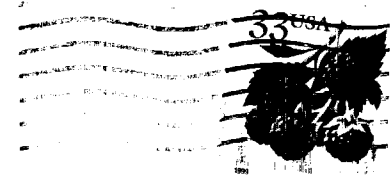

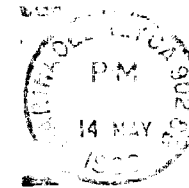

Sincerely,

Dennis Moore Sally Moore
